

It's late.

The Pharmacy is still open.

YOUR PHARMACIST: A CRITICAL MEMBER OF YOUR HEALTHCARE TEAM

Fevers don't know that it's 5:00 in the evening. Aches don't take the weekend off. Sore throats don't recognize a holiday.

Luckily, your pharmacist is there for you, providing top-quality healthcare services. From recommending a remedy for a child's cold to consulting with seniors on diabetes treatments, pharmacists are experts on medication management and other healthcare concerns. They keep track of patients' prescriptions, thereby, avoiding dangerous interactions. They do all this and more... **no appointment needed.**

PHARMACIST AWARENESS WEEK: MARCH 1-6, 2010

BRING YOUR PHARMACIST INTO THE PICTURE
